**Solar Canopy Installations are Complete** 

Great news! The solar canopy installations at the Social Science, Student Center, and Mesa parking structures are complete. Parking is once again available on the top floor of each structure. With the 11,700 newly-installed solar panels, UCI has quadrupled the amount of green power it generates on-site, producing enough power for the electrical needs of 1,800 homes. Thank you for your patience and flexibility during this major installation.

**Bike Month Celebrations: Wrap Up** 

Every May, UCI Transportation celebrates National Bike Month by hosting various events and educational seminars to encourage safe and predictable bike riding on campus. This year was the grandest celebration yet.

Our two-day bike festival, held at the Aldrich Loop flagpoles, showcased interactive bike demonstrations, a tricycle obstacle course, games, food, and dozens of prize drawings. Anteaters learned how to fix a flat tire, ride confidently on the road, and the best way to put their bike on a bus. With more than 5,000 students, faculty and staff currently commuting to campus on bikes, this festival was well-attended and a major success!

Congratulations to Nicholas Leflohic, Eduardo Cruz, and Danielle Kane, the lucky winners of UCI-themed beach cruisers! We hope to see you all next May.

 THE END OF JUNE

**Lighting Improvements along Anteater Drive** 

In addition to UCI Transportation's efforts to reduce commuter emissions, energy usage is continually evaluated to meet campus sustainability and efficiency goals. As part of an ongoing partnership with Facilities Management, new adaptive street lighting controls were installed along Anteater Drive. These new controls provide lighting at full power when pedestrians, bicycles, or vehicles are detected, and at half power when no movement is detected. The lights are turned off during daylight hours. The installation of unique software allows programmable control of lighting, and defers the need to update light fixtures, resulting in maximum energy and cost savings.

**Travel Stress-Free to Commencement** 

Congratulations to the 50th graduating class of the University of California, Irvine! UCI Transportation is committed to supporting the graduates and their guests during Commencement by facilitating unique traffic patterns and coordinated parking locations, accommodating thousands of visitors this coming weekend. For the safety of all, please adhere to the direction given by pedestrian and traffic directors.

Watch the following video to ensure a smooth travel experience to UCI's 50th Commencement:

**Student Parking During the Summer** 

During the summer, we know many UCI students stay on campus for classes, research, internships, and many extracurricular activities. To support these committed summertime Anteaters, UCI Transportation offers "summer commuter permits" that are not zoned. With a summer commuter permit, you can park in any valid "S" parking structure or lot around campus.

Summer commuter permits will be available online, beginning Wednesday, June 17, on ["myCommute"](#).

**UCI is Golden for the 5th Consecutive Year** 

For the fifth consecutive year, UCI was honored with a Race to Excellence Gold Award, the highest honor offered by the National Center for Transit Research, in a program designed to encourage sustainable transportation innovation. This honor identifies UCI as one of the "Best Workplaces for Commuters" on a national level.

National Center for Transit Research recognizes businesses and universities who have taken exemplary steps to offer transportation options such as vanpool and transit benefits for their employees.

**Summer Maintenance Begins** 

Summer is the time when UCI Transportation's maintenance team begins preparing for the upcoming school year. Planned improvements include asphalt sealing, paving, and repainting of campus parking lots and updating signage and markings. This summer, in partnership with Facilities Management, UCI Transportation will also assist in repairs along several campus roadways.

As this work may impact pedestrian and vehicle pathways, please use caution and watch for temporary detours and partial closures. For dates regarding upcoming maintenance, visit [our website](#).

**AED/CPR Trained Staff** 

UCI Transportation is proud to work closely with the UCI Police Department during campus emergencies. As such, our enforcement staff are CPR, First Aid and AED certified. Additionally, all enforcement vehicles are equipped with automated external defibrillators. Remember, in an emergency you should always dial 9-1-1.

**Receive UCI Mail Delivery Notifications** 

To improve mail services for departments, UCI Distribution has launched its new mail delivery notification program providing text or email updates when mail is delivered. This program is our latest effort to improve and streamline mail services for the campus. To sign up for this complimentary service, please click [here](#).
