ABOUT EAST PELTASON DRIVE & ENGINEERING SERVICE ROAD TRAFFIC SIGNAL

The installation of a new traffic signal at the intersection of Los Trancos and East Peltason Drive will improve traffic flow and give safer crossings for pedestrians and cyclists in the area. Construction will widen the south-bound Engineering Service Road approaching East Peltason Drive and turn the shared left-turn/right-turn lane to two separate lanes. The traffic signal along East Peltason Drive will be synchronized to enable the maximum number of vehicles to pass through, thereby reducing stops and delays experienced by motorists.

EXPECTED COMPLETION
2019

→ Safer crossings for pedestrians
→ Separate turn lanes for improved traffic flow
→ Synchronized traffic signals
